Profile

I'm a Computer Engineering graduate from AAST with hands-on experience building production tools used daily by real teams. From internal IBM platforms to freelance client work, I focus on solving workflow problems with clean architecture and interfaces that actually make sense to use.

Education

2019 – 2024 **Bachelor of Engineering**
Arab Academy for Science, Technology & Maritime Transport
Major: Computer Engineering

2019 **High School (IGCSE)**
Port Said British School

Professional Experience

2025/04 – present **Hardware Technical Support (USA) - Lenovo**
IBM

2024/11 – 2025/02 **Software Engineer - Trainee**
United Systems Co.

Projects

Omni Portal

IBM

Multi-system ops platform for call-center break scheduling and QA scoring.
A real-time workforce operations portal that schedules agent breaks, enforces capacity and shift rules, and runs a full QA call-scoring workflow. Built for call-center team leads and admins managing dozens of agents across overnight

Agent Notes App

IBM

Tech Stack: Electron, JavaScript, HTML, CSS

Designed and developed a cross-platform desktop application to improve internal documentation and agent productivity. Implemented structured note management, persistent storage, and UI improvements across multiple versions. Maintained version releases and coordinated updates with team members. Focused on usability, performance, and real-world workflow optimization. Presented the application to business stakeholders as a scalable internal platform

Inventory Management System

IBM

Tech Stack: JavaScript, HTML, CSS, MySql

Developed an inventory management application to track items, quantities, and status in an organized system. Implemented features for adding, updating, and removing inventory records. Designed a clear and intuitive user interface to improve data visibility and accuracy. Applied structured data handling and validation to reduce errors. Focused on scalability and real-world usage scenarios

Pyramids Adhesives

Landing Website (Freelance)

Developed a responsive and multilingual landing website for a company specializing in adhesive manufacturing. Built with pure HTML, CSS, and JavaScript, ensuring an engaging user experience with smooth performance and optimized media elements.

Skills

React	NodeJS	Tailwind CSS	Azure
Git	MYSQL	Python	C
C#	Django	Software Testing	

Certificates

- CSS, Bootstrap, Javascript, Web Development Course - Udemy 
- Routing & Switching - Ruijie Certified Network Associate 

Languages

English — Fluent
Arabic — Native/Bilingual
